COURSE DESCRIPTION

Objective

This undergraduate seminar course is designed to survey the major international relations topics of the People's Republic of China with a specific focus on the Chinese perspective. China's reform and opening up, launched in the late 1970s, has produced an economic miracle unprecedented in world history. Riding on the wave of globalization, China has managed to rise economically as well as geopolitically and is now a crucial actor in global governance. This course will focus on Chinese diplomacy in the era of globalization, and will unravel the role that Chinese diplomacy has played in integrating China into the existing international system. The course will further explore China's desire to be a part of the architecture of global governance and its stated policy of continuing to work within the present international system. This course pays attention to the application of different international relations theories to the problems under study. The course also aims to familiarize students with China's involvement in world affairs from both historical and contemporary perspectives and equip students with an analytical understanding of the dynamics of China's foreign policy.

Pre-requisites /Target audience

The course is for students who are interested in China's foreign policy, particularly China's participation in global governance. Although no prior knowledge of international relations is assumed, a general understanding of Chinese history and politics will be conducive to classroom discussion.

Assignments (essay or other forms)

Presentation & Discussion

The presentation and discussion session are organized according to the following pattern:

Each group is required to do at least one 20 minutes presentation on a selected topic (based on the reading assignment) and take key learning points from the class.

After the presentation, another student will be invited to make some comments on the presentation and contrast it with his or her reading notes.

The order of presentation will be decided at the beginning of the semester. However, the discussants will be selected randomly on the spot.

Though ample time for preparation is given, and the presentation grade is separate from the grade on participation, this does not mean that one can lean back after completing the presentation – critical key learning points relating to the presentation of others, and how it relates to the readings, will follow!

Term Paper

Students will be asked to write a research paper (no more than 3,000 words in length, excluding bibliographies & citations) on a topic relevant to one of the themes of the course.

The essay should be submitted via email with the essay as an attachment in MS-word to the TA no later than the designated due date:

✧ *Friday, July 25, 2025 at 5 p.m.*

Essays and assignments not received on or before the due date are subject to penalty. Late work is penalized at the rate of 20% of the full marks of the assignment per day submitted after the applicable above subscribed due dates. The maximum penalty for any assessment will be 100%.

All papers should be typed in Times News Roman font style, double-spaced, with 12-point font and standard margins, have page numbers, and should include references following the Chicago style.

Evaluation Details

1. Presentation (15%): Students will be divided into groups through a random sorting. Beginning with the second week, class meetings will start with student-led presentation (approximately 20 minutes), followed by Q&A

Session (approximately 25 minutes). Presentation topics should align with the theme of that week and need to be confirmed beforehand in consultation with the Professors and TA. Recommended topic areas are provided in the reading assignment section. Students are also encouraged to go beyond the suggestions and propose new ideas related to the theme of the week. Presentations are expected: to describe specific policy issue(s) in a clear and understandable manner; to analyze the topic from several different perspectives; and to provide a set of clear recommendations for policy makers.

2. Participation/Performance (10%): Discussion constitutes a key component of the class. Students are expected to complete all the required readings prior to class meetings and to actively engage in and contribute to class discussions in a manner that is helpful for understanding and learning. Students are strongly encouraged to share their opinions and perspectives on issues pertaining to the lectures and will be evaluated based on the quality of their contributions in terms of key learning points and engagement. The TA will keep a record of students' weekly contributions. The key criteria for assessing performance are: How much and how well did each student mobilize understanding and learning for fellow students in the class?

3. Attendance (5%): Students are expected to attend all the classes. If you can't attend a class for an unavoidable reason, please seek permission from the Professor in advance for approved leave and subsequently inform the TA.

4. Term paper (30%): Students are encouraged to define a research topic of their choice. However, this must be negotiated with Professor or TA and relate directly to the themes of the course. A writing template will be provided as a guide for technical issues such as citation style, line space, bibliography, etc.

5. Final Exam (40%): is scheduled for 2.00~4.00 p.m., July 11, 2025.

Textbooks and Reading Materials

A course reader (electronic version) containing core readings for each week will be provided. Please note that students are responsible for finding readings that are not included in the course reader.
