

David Daleke

Vice Provost for Graduate Education and Health Sciences & Associate Dean of the University Graduate School

“What started as a partnership between IU and Tsinghua in 2010 has now expanded to more than 10 partner institutions. Each year we have strong interest in the program not only from IU faculty members, but also from high-achieving students worldwide. With the experience that ISURP provides, student participants gain a better understanding of independent research, graduate studies and the academic culture at IU. As a result, they make better informed decisions about their future careers, including pursuing graduate study at IU.

The University Graduate School continually strives to provide an excellent learning and cultural experience for our ISURP scholars and we look forward to welcoming future scholars.”

Thank you to our Partner Universities

China

Tsinghua University

INDIANA UNIVERSITY

International Summer Undergraduate Research Program

INTERNATIONAL SUMMER UNDERGRADUATE
RESEARCH PROGRAM

About Indiana University Bloomington

"At 200 years old, IU Bloomington is IU’s oldest campus and one of two core IU campuses. It is one of the top schools in the nation for the number of students going abroad, according to the Institute of International Education. IU Bloomington offers more than 550 academic programs and Big Ten athletics on a storybook campus."

About the Program

The eight-week IU-International Summer Undergraduate Research Program invites high-achieving undergraduate international students in STEM fields to gain hands-on research experience while living on campus at IU Bloomington.

Launched in 2010 in partnership with Tsinghua University, the program has since expanded to include many other universities internationally. ISURP's vision is to make a connection and form new relationships between Indiana University and these high performing international universities and their students.

ISURP's vision is to make connections and form new relationships between Indiana University and these high performing international universities and their students. It is also our goal to promote student recruitment from these top international universities.

The Summer program consists of:

- 8 weeks of lab research at Indiana University, Bloomington campus
- Room and board provided by Indiana University
- Cultural events
- Poster presentations at the conclusion of research

Participating Programs

- Biology
- Biochemistry
- Chemistry
- Medical Sciences

Cultural Activities

There is much more to ISURP than the research and educational experiences. Visiting scholars have the opportunity to experience life and culture in Bloomington and the surrounding areas.

Dinner at BuffaLouie's

Boating & Hiking around Lake Monroe

Baseball Game at the Indianapolis Victory Field
